One application of Ride-On TPS also reduces porosity leaks that cause tires to naturally deflate over time. By eliminating air leaks, maintaining proper inflation pressure, and balancing your tires, Ride-On improves your motorcycle's fuel efficiency, and your tires will run cooler and last longer - up to 25% or more!  

**GO GREEN!**

**Under inflated tires wear up to 25% faster**

**How Does it Work?**

Once treated with Ride-On TPS tire sealant, your tire literally fixes itself! If the crown area of your tire is punctured by an object up to 1/4" in diameter (1/8" in tube tires), the centrifugal force of the rotating tire and the internal air pressure force Ride-On into the hole, sealing it virtually instantly. Ride-On TPS is up to 90% effective in tubeless tires and 65% in tubes.

**Benefits of Ride-On TPS**

- One treatment is good for the legal life of the tire.
- Converts any tire into a self-sealing tire.
- Helps seal porosity leaks that cause tires to deflate over time.
- Converts any tire into a self-balancing tire without the need for wheel weights.
- Helps extend tire life by up to 25% or more.
- Helps improve fuel economy by 1 to 3 percent.
- Will not harm tires and wheels.
- Safe to use - Non-Flammable, Non-Hazardous, Biodegradable - TPMS friendly.
- Does not create a mess or get on the wheels when tires are changed.
- Suitable for all weather conditions - Specially formulated to prevent freezing at extremely low temperatures and separation at high temperatures.

**Coverage Area**

**Continuous Balance**

With one installation of Ride-On, wheel weights become a thing of the past. While Ride-On works in conjunction with traditional wheel weights, you will not need them anymore. Ride-On is specially formulated to hydrodynamically balance high-speed tires and dampen road noise and vibrations that cause a rough ride. The great thing is Ride-On will continue to adjust and literally rebalance your tires as you ride for the legal life of the tires. Keep your tires balanced and extend their life.  

**GO GREEN!**

Your Tires Have it Tough

Potholes, glass, nails and countless other debris. The road is strewn with hazards that cause punctures that lead to big problems and costly repairs. Even without a puncture, tires are porous and naturally lose up to 3 psi or more each month from porosity leaks. Low air pressure leads to reduced gas mileage, faster tire wear, poor handling and puts you at a greater risk of a tire blow-out.

Don’t Repair - Prepare!

Your motorcycle doesn’t come with a spare tire, and plug kits or old-fashioned latex based aerosol tire inflators and sealants do not work until AFTER your tire goes flat. Either way, do you really want to waste time fumbling with nozzles and plugs during a rainstorm, at night, on the side of a dangerous highway, or in the middle of a bad neighborhood? Thousands of accidents, injuries and deaths occur each year on highways and roads due to breakdowns. Why become a statistic?

Get Ride-On Armor for the Road!

Be proactive, not reactive - protect your tires and yourself with the revolutionary product, Ride-On Tire Protection System (TPS). While you drive, a protective layer of Ride-On TPS - a gel-like substance containing fibers six times stronger than steel - coats the inner liner of your tires. This protective coating not only makes your tires virtually impervious to flats, but also actively balances them for LIFE!

Peace of Mind on the Road We Have You Covered

Inovex Industries, Inc. is dedicated to providing you with the most advanced line of tire protection system tire sealants and balancers. Your safety and peace-of-mind are our first priority. If you purchase Ride-On from an authorized Tire Coverage Plus 24 (TCP/24) dealer in the USA and Canada for your street legal bike, you may be entitled to a FREE one year membership in the TCP/24 Tire Road Hazard and Roadside Assistance Program*.

Free One Year Membership!

The TCP/24 program is a comprehensive benefits program* that includes:

- Tire repair/replacement up to $150
- 24-Hour Emergency Towing up to 15 miles
- 24-Hour Emergency Road Service
- 24-Hour Emergency Battery Service
- 24-Hour Emergency Fluid/Fuel Delivery
- Travel Benefits, trip Routing
- Trip Interruption Protection
- Online Travel Discounts
- Rental Car Discounts
- Hotel Discounts
- Theft and Hit and Run Coverage

* Complete details are provided upon customer registration as benefits may vary.

Frequently Asked Questions

Q. Do I need to buy new tires to have Ride-On Installed? Is Ride-On a special tire?
A. No. Ride-On can be installed in any tire, new or used to convert it into a self-sealing and self-balancing tire.

Q. How often do I have to retreat my tires?
A. One treatment of Ride-On lasts the legal life of the tire or five years from the date of installation.

Q. Will Ride-On harm my tires, wheels, or void my tire warranty?
A. No. Ride-On is inert and does not affect your tires, wheels or most tire warranties.

Q. Will it affect my tire pressure monitors (TPMS)?
A. No. Ride-On is TPMS friendly**.

Q. How does temperature extremes affect Ride-On?
A. Ride-On has been formulated to work from -40°F to more than 212°F (-40°C to 100°C).
One application of Ride-On TPS also reduces porosity leaks that cause tires to naturally deflate over time. A. No. Ride-On can be installed in any tire, new or used to convert it into a self-sealing and self-balancing tire.

Q. How often do I have to retreat my tires?
A. One treatment of Ride-On lasts the legal life of the tire or five years from the date of installation.

Q. Will Ride-On harm my tires, wheels, or void my tire warranty?
A. No. Ride-On is inert and does not affect your tires, wheels or most tire warranties.

Q. Will it affect my tire pressure monitors (TPMS)?
A. No. Ride-On is TPMS friendly**.

Q. Can I use Ride-On in my tube tires?
A. Yes. Ride-On seals punctures from objects up to 1/8" (3.2 mm) in diameter that penetrate the tube. Ride-On is very effective (up to 65% efficiency or more) as long as the puncturing object doesn’t tear the tube.

Q. Can I use Ride-On in my tubeless tires?
A. Yes. Ride-On seals punctures from objects up to 1/4" (6.4 mm) in diameter that penetrate the crown of your tubeless tire. Ride-On should not be used as a permanent tire repair in motorcycle tires.

Q. Will it affect my tire pressure monitors (TPMS)?
A. No. Ride-On does not affect your tires, wheels or most tire warranties.

Q. Will Ride-On harm my tires, wheels, or void my tire warranty?
A. No. Ride-On is inert and does not affect your tires, wheels or most tire warranties.
